

NEW

ECOLINE DECKING

ECOLINE ECOLOGICAL BOARDS

Ecoline boards are new ecological decking products made in Czech republic.

ECOLOGICAL BENEFIT AND CERTIFICATION

Ecoline decking boards are made only from sorted recycled material, scraps from Terafest products. Terafest products are made only from wood from sustainably managed forests. Thanks to this, Ecoline boards meet the PEFC certification as well, which guarantees that the wood come from ecologically resources.

The use of 100% recycled material also means that Ecoline boards contribute to gaining points in prestigious building eco-certifications such as LEED or BREEAM. These boards are the ideal choice for construction projects that emphasize environmental responsibility and sustainability.

WHY CHOOSE ECOLINE?

Ecoline decking boards offer everything you expect from a quality WPC material – high weather resistance, easy maintenance and a modern look. Thanks to the use of recycled materials and production in accordance with PEFC certification, they also add an important ecological dimension, making them the ideal choice for anyone who wants to contribute to the protection of our planet.

136 Ecoline Classic Natur Teak

136 Ecoline Classic Natur Mahagon

136 Ecoline Classic Natur Eben

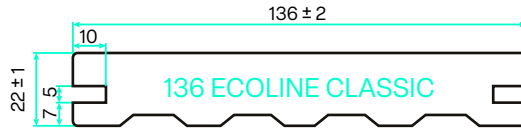

BREEAM®

LIMITED EDITION

Ecoline boards are available as a limited edition, making them a unique product for customers looking for an ecological solution with an exclusive character. The limited availability of this edition adds to its attractiveness and underlines the uniqueness of the use of recycled materials.

PROFILE

PROPERTIES

profile	dimensions	standard length	custom length	weight
136 Ecoline Classic	136 × 22 mm	4 m	2 - 6 m	3,3 kg/bm

Dimensional tolerance: length +/- 10 mm, width +/- 2 mm, thickness +/- 1 mm.

NATURE-INSPIRED COLOURS

Ecoline boards are available in three elegant color variants:

- **Teak** – a natural light color with a subtle natural shade
- **Mahagon** – a deep, warm color with a distinctive dark tone
- **Eben** – a dark black color with a fine structure

These three colours are designed to resemble popular base colours. However, as they are made from 100% recycled material, the resulting color tone can easily change during production. This gives the boards their authentic and natural look, which harmoniously complements any decking or facade.

Color fastness is guaranteed, as with all other Terafest® products.

KEY FEATURES OF ECOLINE BOARDS

Made from 100% recycled material

Sustainable solution without compromises on quality

Resistance and durability

The same mechanical and aesthetic properties as boards made from new raw materials

PEFC certification

Use of wood from sustainable sources, confirmed by the PEFC certificate

Eco certificates

Contributes to achieving points in LEED and BREEAM

Limited edition

Exclusivity and uniqueness for your projects

Color variability

Three natural colors inspired by Teak, Mahogany and Ebony

BREEAM®
